Vocabulary Quiz Sheet — Teacher Guide

How to write a quiz that uses the 20-question vocabulary answer sheet, make its key, and read the results. Students mark the answer sheet; your quiz (the terms, definitions and questions) is a separate page you write and copy as usual.

1. The three parts

Part	Questions	Choices	What it checks	Scoring
1 — Matching	1–8	A–J	Recall: term to definition	1 point if correct
2 — Words in context	9–16	A–D	Using the word: one best answer	1 point if correct
3 — Select all that apply	17–20	A–E	Understanding the concept	1 point, only if every correct choice is filled and nothing else

Question numbers never move. Matching is always 1–8, context is always 9–16 and select-all is always 17–20. A quiz with only five matching terms numbers them 1–5 and still starts Part 2 at 9. Rows you do not use are left blank on the key and are not scored.

2. Writing each part

Part 1 — Matching (up to 8 terms, up to 10 definitions)

- Number the terms 1–8 and letter the definitions A–J on your quiz.
- Give two more definitions than terms (8 terms, 10 definitions) so the last matches cannot be found by elimination.
- Say on the quiz whether a definition can be used more than once. The sheet allows either.

Part 2 — Words in context (up to 8 questions, choices A–D)

- Number the questions 9–16. Good formats: a sentence with a blank (which word fits?), "In this sentence, *elastic* most nearly means…", "Which situation is an example of…?", or a synonym/antonym.
- Write one clearly best answer and three believable distractors.

Part 3 — Select all that apply (up to 4 questions, choices A–E)

- Number the questions 17–20 and write "Select ALL that apply" on each.
- Make 1 to 4 of the five choices correct, and vary it: some questions with one correct choice, some with three. **Do not tell students how many are correct** — judging each choice on its own is the challenge.
- Good stems: "Which of these are examples of *scarcity*?", "Which words are synonyms of *frugal*?", "Which statements about a *tariff* are true?"
- Tell students to use pencil for this part. A crossed-out pen mark reads as another answer.

How Part 3 is scored. Each question is worth 1 point, all or nothing. The student earns it only by filling exactly the choices filled on the key: every correct choice, and no others. Missing one correct choice, or adding a wrong one, scores 0.

Key	Student filled	Points	Why
A, C, D	A, C, D	1	Exactly the key
A, C, D	A, C	0	Missed D
A, C, D	A, C, D, E	0	E is not correct
B	B	1	Exactly the key
B	B, D	0	D is not correct

3. Making the answer key

- Take a blank answer sheet. Fill the correct answer for every question you are using. In Part 3, fill **every** correct choice.
- Leave the rows of unused questions completely blank. The key decides which questions count, so there is no question count to set.
- Bubble the version (1–4) if you have more than one, and fill the **ANSWER KEY** bubble in the teacher box. You do not need a student ID on the key.
- Several versions: shuffle the questions or choices within each part (keep each part in its own numbers) and make one key per version.

4. Printing, scanning and reading

- Print the sheet at **Actual size**, not Fit to page, on plain US Letter paper, and set the number of copies in the print dialog.
- Scan the stack (key anywhere in it) to one PDF on a document scanner.
- In the analyzer, choose the PDF and tick **Find the key sheet automatically**. If the stack holds several versions, choose one version and read the stack once for each.
- Check the Review tab. Faint or unclear marks, especially in Part 3, are listed there rather than guessed.
- Keep the four black corner squares and the strip of small squares along the bottom of the sheet free of marks; the reader uses them to find the page.

Sample quiz

A complete example, written for this sheet. Copy the pattern: the numbers on your quiz match the numbers on the answer sheet.

Unit 2 Vocabulary — Economics

Part 1 — Matching. Fill the letter of the definition for each term. Two definitions are not used.

Terms	Definitions
1. scarcity 2. opportunity cost 3. incentive 4. tariff 5. surplus 6. demand 7. entrepreneur 8. inflation	A. a tax on imported goods B. the value of the next-best choice given up C. a general rise in prices over time D. a person who starts a business and takes on risk E. the money a government owes F. limited resources and unlimited wants G. what buyers are willing and able to buy at each price H. something that motivates a person to act I. when quantity supplied is greater than quantity demanded J. an agreement between countries to trade freely

Part 2 — Words in context. Fill the one best answer.

- 9. Maria skipped the movie to study, so the movie was her _____. (A) incentive (B) opportunity cost (C) tariff (D) surplus
- 10. "Gas prices rose so fast that the store's prices changed weekly." This describes… (A) inflation (B) scarcity (C) demand (D) a tariff
- 11–16. Four more questions in the same form.

Part 3 — Select ALL that apply. Use pencil. The point is earned only when every correct choice, and nothing else, is filled.

- 17. Which of these are examples of an *incentive*? (A) a sale price (B) a parking fine (C) a rainy day (D) a bonus for perfect attendance (E) a coupon for a free dessert
- 18. Which situations show *scarcity*? (A) a sold-out concert (B) a store with more shirts than buyers (C) a drought limiting water use (D) a free sample table (E) only one ventilator for two patients
- 19–20. Two more questions in the same form.

The key for this sample (version 1):

Questions	Fill on the key sheet
1–8	1 F · 2 B · 3 H · 4 A · 5 I · 6 G · 7 D · 8 C (E and J unused)
9–10	9 B · 10 A (11–16 as written)
17–18	17 A, B, D, E · 18 A, C, E (19–20 as written)
Teacher box	Version 1 and the ANSWER KEY bubble
